Counterbalanced Forklift

1.5-3.8t KP Series Electric

Serialization Design, Elegant Appearance;
Lithium Battery and Lead-acid Battery Are Exchangedable,
Strong Universality.

Comfortable, Practicable & Handy

Relay on XCMG own core technology and parts, Kun-Peng Series Electric Counterbalanced Forklift practice the “Leading Technology, Everlasting Products” Golden Standard, produce mid-to-high end electric forklifts product with high cost performance ratio.

· High-efficiency

Kun-Peng Single Drive Type C, overall performance surpass traditional electric forklifts, high operating efficiency.

P.s: display data only suitable for XCB30P2-C/P5-C/L2-C/L5-C model, for other data please check technical data sheet.

· Unlimited cruising ability

lead-acid and lithium battery can be fast replaced, handy for multiple working schedules or battery charging free area.

· Easy maintenance

floor pad and balanc-ing-weight cover are easy disassembly, main mainte-nance parts are located at front or rear conspicuous positions.

· Excellent applicability

PSE three gear switch to fulfill different speed or different acceleration needs.

· Ergonomic

Wide view mast, USB port, Cup holder, Cell phone holder, three gears and wide space form excellent ergonomic.

* Optional thumb operating system

Steady, Reliable and Durable

• Important parts had passed market tests and been proved their durability

Kun-Peng's driving axle, turning axle and mast all have great market stocks.

• Lithium battery have pass all necessary tests

protection level $\geq$ IP67, great overall protection; Use active equalization Battery Manage System technology, can great reduce battery voltage differences, improve battery consistency and life span.

Low temperature tests

Electric Performance Test

• High Environmental Adaptation

Overall Forklifts Pass IPX4 Waterproof Tests

Stability Test

Lithium and Lead acid Battery Shares Unified frame

• Universal Design 1.5-3.8t Kun-Peng Forklifts' Overhead guard, Covers, Display panel can be exchanged.

• Applicability Design Suitable for different operation condition.

- ①: Mast is sturdy and durable, had been tested by markets;
- ②: Large Tires Design, strong road grip;
- ③: High ground clearance, great passing ability;
- ④: Use electric forklift's balancing weight, less turning radius; Lower center of gravity, much safer while unladen;
- ⑤: Integrated balancing weight design, better gravity center layout, great load capacity.

• Lead-acid and Lithium battery use the same forklift frame, easy for switch battery

• The same capacity Lithium battery can be used in different tonnage forklifts
